

This is to express concern over proposed BPL/PLC technology as a cause of substantial interference to the Amateur Radio HF bands, as well as other communication modes. As a licensed radio amateur (K9OR), I would encourage the FCC to examine all aspects of this issue to insure the rights of existing spectrum users, and not be pressured by commercial interests. The potential for interference over large portions of the radio spectrum and over long distances appears to be significant based on existing studies. Thank you for your consideration in this important matter.
